Fifth International Fascia Research Congress
Attn: Libby Eason and Anita Boser

Dear Congress Associates,

In the name of Fascia France, the French association of DBM Fasciatherapists, I have the pleasure to send my support for the 5th Fascia Research Congress which will be held in Berlin on 14th and 15th of November.

Our association consists of French DBM Fasciatherapy practitioners. We have been involved in FRC since the first congress, in 2007, and we regularly diffuse in French the findings presented at the congress.

We are very happy that this congress will happen in Europe for the 2nd time. It is a great chance to be able to bring together eminent researchers and practitioners in the field of fascia, and to be a part of this international network.

We congratulate the organizers for the quality of the program, which we believe will contribute to enriching and consolidating our practices and our clinical thinking.

Anouk Serre,
president of FasciaFrance.
